

MegaMast Stabilizer Instructions

Contents

- A) Ropes with Pulleys
- B) Collar with Arms
- C) Top Plate

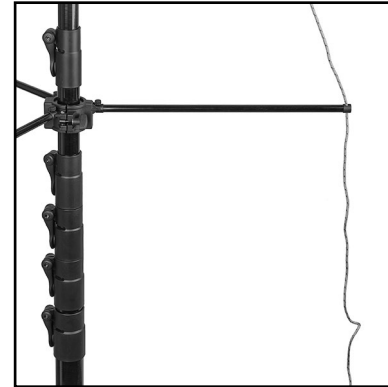

Step 1

Unscrew the head and place the top plate onto the MegaMast. Then Screw the head back onto the mast.

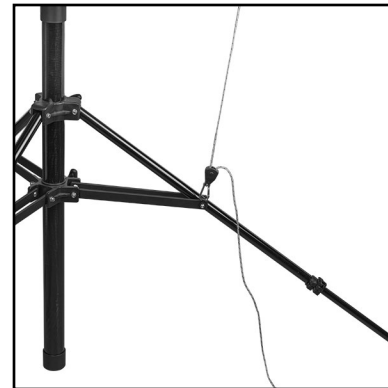

Step 2

Attach the clips on the ropes to each of the three holes on the top plate.

Step 3

Attach the collar & arms to the 4th from the bottom riser section on the 27.5' MegaMast or the 3rd from bottom riser on the 23' version.

Step 4

Raise the mast to the desired height. Then attach the pulleys to the hooks on the legs and pull the ropes snug.

Notes

- The pulleys can be attached to tent stakes in the ground for greater stability.
- Do not over-tighten the ropes. Pull each one a little at a time until they are snug.
